Notification Description (Including Extent, Purpose / Reason, and Effect on Form, Fit and Function)

As part of our ongoing continuous improvement efforts, US Digital is changing the marking method of the PC3-H5, PC4, PC5 and PC6 products. The purpose for this change is to create a more robust solution by utilizing laser marking versus the current paper label solution. The products effected will now be laser marked as shown in the photos below.

Side-by-side comparison of the current PC4-H5 labeling (left) and the new PC4-H5 laser marking (right).

Product Change Notification

PC3-H5, PC4, PC5, PC6 Marking

PCN-6228

Side-by-side comparison of the current PC5-H10 labeling (left) and the new PC5-H10 laser marking (right).

Please note the PC3-H5 and PC6 are not shown, but will have similar marking to the PC4-H5.

If you have any questions or concerns about this PCN, please contact our Technical Support Group at 360-397-9999 or email support@usdigital.com.
